

Colourful pieces of Lego jumbled together are piled into a box. Dumping it, the hard plastic bricks clatter to the floor. Click, snap! Circular bumps fit perfectly in tiny circular holes. Interlocking and overlapping small Lego bricks build a sturdy wall. Castle, dinosaur, dirt bike, airplane, space ship and dog sled are just a few possible building projects. Yesterday's creation is dismantled only to become today's masterpiece. Brightly coloured Lego candy is a real kid magnet.
